Research Statement

I am an expert in taxonomy, systematics, ecology, and paleontology of scarab beetles (Coleoptera: Scarabaeoidea). My research interests focus on exploring and explaining the high diversity in this insect group, on determining the ecological roles of its various guilds, as well as on identifying and explaining the effects of anthropogenic disturbances and changes, particularly on dung beetle communities. Ecological studies on a solid taxonomic foundation and collection-based research are key components on my work.
